

Template Tools For Flexi 7 and PhotoPRINT 3

Templates are a new tool to help customers look more professional, in far less time.

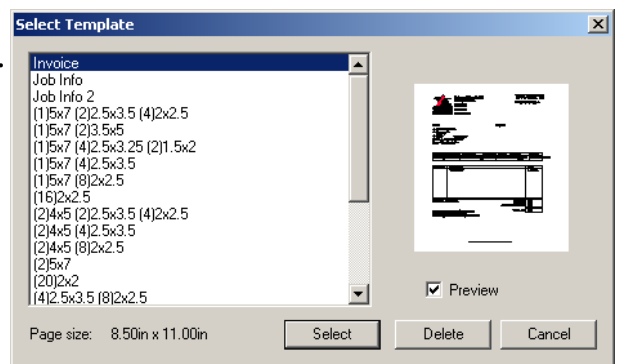

Here are the steps for using, editing and creating Templates:

APPLY an existing Template:

You have your design, and now want to use an existing Template...

- Create your design
- Click on FILE and roll down to TEMPLATES
- Click to Select APPY TEMPALTE to open Select Template window
- Click to highlight a Template style from the list on the left
- Preview the Template Style in the window on the right
- Click APPLY to utilize the highlighted Template you want

A new drawing named UNTILTLED # will open with your design filling the Template as you previewed. Your original design remains unchanged.

EDIT an existing Template:

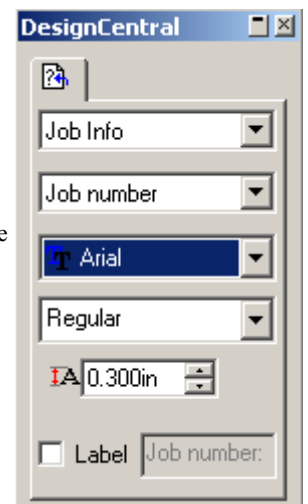

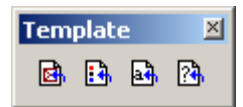

You want to change an existing Template...

- Click on FILE and roll down to TEMPLATES
- Click to Select OPEN TEMPLATE to open the Template Selection Window
- Click to highlight a Template style from the list on the left
- Preview the Template Style in the window on the right
- Click OPEN to open the highlighted Template you want
- Click on FILE, roll down to TEMPLATES and click on TEMPLATE TOOLBAR
- Use the Template Tools to change any of the existing data fields, or add new ones
 - Active Drawing Placeholder
 - Used Colors Placeholder
 - Used Fonts Placeholder
 - Job Info Placeholder
- DesignCentral will prompt your options for each information field you change or add
- Edit the template as you would any design, adding objects, fields or logos
- When done making changes, click on FILE / TEMPLATE / SAVE TEMPLATE to save the changes

OR

- Click on FILE / TEMPLATE / SAVE AS TEMPLATE to save your revised template as a NEW Style

Editing templates by adding a logo or phone number will customize the stock library of templates.

CREATE a NEW Template:

You want to create your own Template from scratch...

- Click on FILE, roll down to TEMPLATES and click on TEMPLATE TOOLBAR
- Use the Template Tools to create data fields
 - Active Drawing Placeholder
 - Used Colors Placeholder
 - Used Fonts Placeholder
 - Job Info Placeholder
- DesignCentral will prompt your options for each information field
- Edit the template as you would any design, adding objects, text or logos
- Click on FILE / TEMPLATE / SAVE TEMPLATE to save new style

Creating your own templates with the Template Tools gives you the ability to create templates unique to you, then apply specifically to your shop requirements.
